

in association with

in collaboration with

What makes your project unique or interesting?

Why did you create it?

Answering these questions for yourself will help you communicate your project's significance and the importance of Open-Source.

This event is great for anyone who wants to network with professionals and build a project to benefit their direct community.

Be sure to sign up for our event, Diversion 2022, we hope to see you there!

OUR VISION:

Department of Computer Science and Engineering, Institute of Engineering & Management, Kolkata & IEM-ACM Student Chapter invites students to DIVERSION 2022.

- Participants can contribute to any existing Open-source projects.
- Eligibility: There is no eligibility criteria. Whether you're a student or an experienced professional, anyone is welcome to participate in this program, i.e., it's open for everyone across the globe.

People can contribute to open source projects in fields like AI and ML, app development, web development, cyber security, etc. . We also have projects based on hardware-related domains like IoT and robotics. If the idea is unique we would help the participant to get a free patent. Also, he/she can compete with their own project idea and we would be more than happy to help them achieve that.

The only thing that must contain in the idea is scalability so that more participants can work on it.

COLLABORATORS

The Perks :

- We shall bring forth all of your upcoming events and happenings to the fore and it will be costless publication of all your activities in our platform.
- We shall highlight it to many renowned youtubers in the specific domains and it will also get exposure to all our events including DIVERSION.
- We will be glad if you build up a limelight for our event and unfurl all our happenings to all the enthusiastic scholars and let them partake in it

In real open source, you have the right to control your own destiny.
- Linus Torvalds.
